# Microproject - SDG Nr. 4

Sustainable development – a course for companies

## Learning Objectives

- Identify the targets of quality education
- Transfer the targets to your context
- Provide new ideas for sustainable lifestyles

## Description

SDG number 4 aims to ensure inclusive and equitable quality education and promote lifelong learning opportunities for all. Studies show that education is the key to prosperity. The SDG number 4 uses different targets to ensure that quality education will be implemented until 2030: Like free primary and secondary education (ensure that all girls and boys have access to free and equal education offers), equal access to affordable technical, vocational and higher education, universal literacy and numeracy and education for sustainable development and global citizenship.

Let's concentrate on the last target. It aims to ensure that all learners acquire the knowledge and skills needed to promote sustainable development, including, among others, through education for sustainable development and sustainable lifestyles, human rights, gender equality, promotion of a culture of peace and non-violence, global citizenship and appreciation of cultural diversity and of culture's contribution to sustainable development.

How can this target be promoted in a microproject that can be used by entrepreneurs? Let's assume you want to promote a more sustainable lifestyle in your company. How can this be done?

### Possible roles of the trainees and skills needed

Imagine you want to realize a microproject in your company which aims to deliver a training course based on a more sustainable lifestyle. You will be responsible to conduct this training course and plan its content. Later on, you will be responsible to present the training course to your co-workers and bosses.

<p><b>Theoretical activity</b></p>	<p>Collect information about sustainable development and sustainable lifestyles, human rights, gender equality, promotion of a culture of peace and non-violence, global citizenship and appreciation of cultural diversity. What do the terms mean? What is the state of these indicators in your company? Or if you are having a new business idea: How can you implement and increase these indicators in your business idea?</p>
<p><b>Creative activity</b></p>	<p>Now you don't want to just provide information about sustainable development. You want to actively act on it. Let's say you want to increase sustainable lifestyles through your entrepreneurial business idea. One idea could be that you conduct a vegan week once in a month. That means that all in the office are trying to eat vegan. Here you can provide your co-workers with vegan recipes. Look for vegan recipes and provide them in your office.</p>
