# Microproject - SDG Nr. 17

## Partner mapping for Social Enterprises

### Learning Objectives

- Identify the targets of the SDG number 17
- Identify your organizations values

### Description

The Sustainable Development Goals can only be reached if everyone participates. Therefore, we need strong partnerships at global, national, regional and local levels. These partnerships should be based on values and shared visions. We need cross-sectors and cross-country collaborations to pursue the SDG goals. These collaborations should be done between governments, the private sector and the civil society.

The SDG number 17 has different targets for example: Mobilize financial resources for developing countries, assist developing countries in attaining debt sustainability, invest in least-developed countries or knowledge sharing and cooperation for access to science, technology and innovation.

<p><b>Theoretical activity</b></p>	<p>Do research: Which targets has the SDG number 17?</p> <p>How do you think you can combine these targets on your local/regional or national level?</p> <p>How can we combine to foster sustainable partnerships and social entrepreneurship?</p>
<p><b>Creative activity</b></p>	<p><b>Step 1:</b> To developed sustainable partnerships do a partner mapping of other social enterprises in your region/country.</p> <p>To do the partner mapping we should be first very clear: What values does your company offer?</p> <p>Do a map of the values of your social enterprise answering the following questions:</p> <ul style="list-style-type: none"> <li>• Who are you providing value for?</li> <li>• On which social issue is it based?</li> <li>• What kind of value are you providing?</li> <li>• How are you providing value?</li> <li>• Do you offer any innovative aspect?</li> <li>• Is the value you offer based on an SDG?</li> </ul> <p>Once you have a clear vision you can start to do a mapping of your partners.</p> <p><b>Step 2:</b> Make a mapping of institutions/companies and organizations that are based on the same values as yours. Add also institutions/companies and organizations that support other values based on the SDGs that could offer an new aspect to your business idea.</p> <p><b>Step 3:</b> Reach out to them and try to develop a network.</p>
